

PROVEN EXPERIENCE in the Health and Aged Care sector.

Designing tailored systems for fire safety and ongoing management.

Hospitals, healthcare services and aged care facilities require specific tailored solutions when it comes to fire safety, systems and fire protection.

Our team of qualified and experienced fire safety specialists work with a range of clients in healthcare and aged care services, ensuring we apply best practice systems for your ongoing fire safety.

Understanding the nature of the healthcare sector, sensitivities of medical equipment, technology and on-site chemicals, as well as the varying mobility of occupants, is vital in designing and implementing systems to manage fire safety and prevention for buildings and occupants.

Expert solutions for fire safety and prevention.

EndFire Engineering's fire safety technicians hold relevant industry licences and accreditations, including specialist credentials for the implementation of facility-specific fire management systems.

We provide advice on building design for sectioning off areas separated by hospital-grade fire doors, the location of detectors and systems, wet systems and dry suppression systems, gaseous systems, onsite procedures and processes. We also source and supply specialist fire safety equipment, including sprinkler systems and extinguishers.

Site developments, upgrades and maintenance.

We have provided specialist services to a range of clients in the health and aged care sector, including:

- Christchurch Hospital Redevelopment, New Zealand
- Townsville Hospital Redevelopment, Queensland
- Cairns Base Hospital Expansion Project, Queensland
- Hervey Bay Hospital - Emergency Department, Queensland

Design. Install. Maintain.

What we do

Service and
Maintenance

Design and
Installation

Systems, Training
and Procedures

Audit and
Compliance

Complete protection for people, assets and your business.

EndFire Engineering provides professional fire systems and safety advice and consultation for the health sector, including the design and installation of systems for new developments and site upgrades as well as ongoing maintenance and compliance of existing hospital and health care fire safety systems and equipment.

Our fire safety technicians are trained and familiar with all brands of fire protection products including Chubb, Wormald, Tyco, Viking, Victaulic, Ansul, Flamestop, Notifier, Siemens, Ampac, Pertronics, and Edwards. And, we provide and service a range of specialist fire safety systems, equipment and hardware for small- and large-scale buildings and facilities from fire detection and warning systems, to sprinkler and deluge systems, suppressants and fire doors.

Fire safety is our priority.

Our team of highly experienced fire protection and safety specialists deliver fire safety solutions focused on keeping you, your employees, and your property safe at all times.

We apply our technical know-how and experience to design, install and maintain fire systems and equipment, providing end-to-end fire systems and safety services for our clients.

Managing fire risk, ensuring compliance and providing maintenance solutions is our priority.

The complete fire protection solution.
