

EXPERT FIRE SOLUTIONS

for the transport and logistics sector.

Managing risk, compliance and maintenance solutions is our priority.

Designing fire safety systems for facilities in the transport and logistics sector requires consideration of the unique aspects of the end-to-end usage chain – from facilities such as warehouses and logistics sites, through to airport and train terminals as well as the varying transport modes – planes, trains and heavy vehicles.

Our team of qualified and experienced fire safety specialists work across a range of sites and facilities to manage end-to-end fire systems and procedures. EndFire Engineering manages initial design and installation of fire safety systems, location of detectors and emergency warning systems, through to types of suppression systems suitable for each environment – wet and dry suppression, gaseous or foam suppression.

Qualified and experienced fire safety professionals.

The EndFire Engineering team are qualified fire safety specialists and hold relevant industry licences and accreditations. We keep up to date with the latest industry legislation and industry specific requirements for your end-to-end fire safety and systems management.

We are experienced in providing customised systems for airports, train stations, warehouses and logistics facilities.

Protecting your business, your employees and your customers and visitors is our priority.

“EndFire Engineering look after the fire protection for the airport which includes hydrants, sprinklers, hose reels, fire extinguishers, fire detectors, fire panels and so on. They offer competitive pricing for their services. They have the technical knowledge, expertise and resources to manage the fire systems and unique requirements at the airport. I’m happy with my dealings with EndFire Engineering and have a good rapport with the onsite team. I would be happy to recommend EndFire Engineering to others.”

What we do

Service and
Maintenance

Design and
Installation

Systems, Training
and Procedures

Audit and
Compliance

Complete protection for your people and your business.

EndFire Engineering provide specialist design and installation, ongoing service and maintenance, audit, compliance and training across a range of facilities in transport and logistics.

Our fire safety technicians are trained and familiar with all brands of fire protection products including Chubb, Wormald, Tyco, Viking, Victaulic, Ansul, Flamestop, Notifier, Siemens, Ampac, Pertronics, and Edwards. And, we provide and service a range of specialist fire safety systems, equipment and hardware for small- and large-scale buildings and facilities from fire detection and warning systems, to sprinkler and deluge systems, suppressants and fire doors.

Fire safety is our priority.

Our team of highly experienced fire protection and safety specialists deliver fire safety solutions focused on keeping you, your employees, and your property safe at all times.

We apply our technical know-how and experience to design, install and maintain fire systems and equipment, providing end-to-end fire systems and safety services for our clients.

Managing fire risk, ensuring compliance and providing maintenance solutions is our priority.

The complete fire protection solution.
